

CHAPTER 14**CULVERTS, BRIDGES, INTERSECTIONS AND PRIVATE ENTRANCES****SECTION:**

10-14-1: Culverts, Bridges, Intersections and Private Entrances

10-14-1: CULVERTS, BRIDGES, INTERSECTIONS AND PRIVATE ENTRANCES:

- (A) Entrance culverts shall be constructed by the developer or subsequent owner at the same time of construction upon the lot and shall be as shown upon the final approved engineering plans and laid to the flow line of the existing ditch. At no time shall such culvert pipe be less than twelve inches (12") in diameter nor less than twenty-four feet (24') in length for private drives or fifteen inches (15") in diameter and thirty-two feet (32') in length for crossroads. Larger culvert pipe may be required if necessary for adequate drainage. The standards and requirements shall be included in the covenants.
- (B) Entrance driveways shall be constructed upon the lots as shown in the approved street design plans or in such a manner as to not interfere with or measurably alter the approved drainage, create traffic hazards, or interfere with public improvement plans.
- (C) All entrance driveways shall be flared with minimum radius dimensions as follows: residential land uses: ten foot (10') radius; commercial land uses: fifteen foot (15') radius; and, industrial land uses: twenty-five foot (25') radius minimums.
- (D) Where lots are subdivided upon an existing thoroughfare and driveway entrances are to have access upon such thoroughfare, engineering plans shall be presented which shall conform to Section 10-12-1(G) and the developer or person initiating driveway construction shall be responsible for conformance to the approved plans. Responsibility and conformance concerning this requirement shall be noted within the covenants.
- (E) Permits shall be required of all persons, developers, commercial, industrial, or residential interests seeking the connection of a road,

10-14-1

10-14-1

street, alley, driveway, or other means of vehicular access to any public road or thoroughfare locate within the jurisdiction of this Ordinance. The authority having maintenance responsibility over the public road or thoroughfare shall be the authority responsible for the issuance of such a permit.

CHAPTER 15**WATER****SECTION:**

10-15-1: Water

10-15-1: WATER:

- (A) The developer shall provide the subdivision with a complete and State-approved water main supply system, which shall be connected to an existing state-approved municipal or community water supply, except that when such municipal or community water supply is not available, the developer shall provide one (1) of the following:
1. A water supply system which will serve the whole development, in accordance with the minimum requirements of the State of Illinois; or,
 2. An individual water supply system on each lot in the subdivision, in accordance with the minimum requirements and recommendations of the State of Illinois and any local ordinances. Private restrictions are to be filed with the final plat and incorporated in each deed so that as soon as a public water supply system is available, connections to the system shall be made at the property owner's expense within one (1) year, and owners shall bear their full, proportionate share of the cost of the public water main as determined by agreement, special assessment proceedings, or other means authorized by law or regulations established by the public water supply system. A water system shall be deemed available when a Village water line of adequate size is within one hundred feet (100') of the subdivision, and capacity is available in the existing water system.
 3. If the subdivider installs a water main supply system which is connected with the Village water supply system in a subdivision located outside of the Village, the subdivider shall require, as a condition of the sale of each lot or parcel in the subdivision, that the owners of such lot or parcel shall not object or remonstrate in any manner any future action of the

Village with respect to the annexation of such lot or parcel to the Village.

The plans and specifications for the installation of a water supply system and a statement of responsibility for maintaining the same shall be provided by the developer and approved by the State of Illinois. Upon completion of the water supply installation, the plans for the system "as-built" shall be filed with the County Health Department, and with the Village.

- (B) Additionally, "restrictive covenants" shall be drafted subject to the approval of the Village pursuant to Section 10-23-2, hereof. If connected or proposed to be connected to the Village water supply system, then a restrictive covenant substantially similar to the following shall be included:

When and if this subdivision becomes contiguous to the Village limits of the Village of Arthur, all record owners of lots in this (name of subdivision) subdivision shall sign a petition to annex all of the subdivision to the Village of Arthur, Illinois, within ten (10) days after being requested by the Village to sign said petition. This covenant shall run with the land forever and is not limited to a term of years.

- (C) The restrictive covenants shall also provide as follows:

In the event that the Village of Arthur, Illinois, shall be required to construct, extend, or make substantial improvements to a water supply system for this subdivision, the total cost shall be divided by the total number of lots in this subdivision and allocated to the record owners of each lot. If the total sum due is not paid when due by a record owner or owners of a lot in this subdivision, then the Village of Arthur, Illinois, may exercise any remedy for the collection of said obligation available under the law of the State of Illinois. Further, the record owner and owners of each lot hereby stipulate and agree that the Village of Arthur Water Department may add to the regular monthly water bill a sum as determined by the Village Board until such time as the unpaid obligation under this covenant has been fully paid, and hereby stipulates and agrees to an additional sum per month, as determined by the Village Board, as a finance charge for the privilege of not paying the obligation when due. The due date of the sum

10-15-1

10-15-1

shall be determined by ordinance, but not earlier than thirty (30) days following substantial completion of the work.

CHAPTER 16

SANITARY SEWERS, SEPTIC SYSTEMS AND ON-SITE DISPOSAL

SECTION:

10-16-1: Sanitary Sewers, Septic Systems and On-Site Disposal

10-16-1: SANITARY SEWERS, SEPTIC SYSTEMS AND ON-SITE DISPOSAL:

- (A) No plat of any new subdivision shall be approved by the Zoning Board unless the same provides for and assures the construction by the developer of a sanitary sewer system adequate to serve the needs of the entire subdivision when the same is fully developed. The sanitary sewer system shall be connected to a State approved sewage disposal system. In no case shall effluent be allowed to flow into ditches or swales, highways or otherwise. The requirement for a sanitary sewer system is subject to exceptions below.
- (B) If the subdivision is farther than two hundred feet (200') from the nearest sanitary sewer, each developed lot shall be of adequate size to accommodate individual sanitary sewage disposal. Such disposal shall be in accordance with the rules and regulations established by the Illinois Department of Health, the Illinois Environmental Protection Agency, and the County Health Department, and based upon soil limitations. However, if there is disagreement between standards, the more restrictive standard shall apply.
- (C) Private restrictions shall be filed with the final plat and incorporated in each deed requiring that as soon as public sewers are available, connections to the public sewer shall be made within one (1) year at the property owner's expense, and owners shall bear their fair and proportionate share of the cost of the public sewer as determined by agreement, special assessment proceedings, or other means authorized to finance construction of sewer systems.
- (D) The plans for the installation of a sanitary sewer system and a statement of responsibility for maintaining the same shall be provided by the developer and approved by the State of Illinois, and the Zoning Board. Such approval shall also be required when the

sewer system connects directly to an interceptor constructed and maintained by such sanitary district or community. Upon the completion of the sanitary sewer installation, the plans for such system "as-built" shall be filed with the County Health Department and Village, and shall be accompanied by an Illinois Registered Professional Engineer's certificate which states that the system has been constructed in accordance with the plans and specifications as set forth herein. In no case shall sanitary sewers be allowed to connect to any other system providing for agricultural or similar land drainage or storm sewer disposal.

- (E) If the subdivider installs a sanitary sewer system which is connected with the Village sewer system in a subdivision located outside of the Village, the subdivider shall require as a condition of the sale of each lot or parcel in the subdivision, that the owners of such lot or parcel shall not object or remonstrate in any manner any future action of the Village with respect to the annexation of such lot or parcel to the Village.
- (F) Additionally, "restrictive covenants" shall be drafted subject to the approval of the Village pursuant to Section 10-23-2 hereof. If connected or proposed to be connected to the Village sewer system, than a restrictive covenant similar to the following shall be included:

When and if this subdivision becomes contiguous to the Village limits of the Village of Arthur, all record owners of lots in this (name of subdivision) subdivision shall sign a petition to annex all of the subdivision to the Village of Arthur, Illinois, with ten (10) days after being requested by the Village to sign said petition. This covenant shall run with the land forever and is not limited to a term of years.

- (G) The restrictive covenants shall also provide as follows:

In the event that the Village of Arthur, Illinois, shall be required to construct, extend, or make substantial improvements to a sanitary sewer system for this subdivision, the total cost shall be divided by the total number of lots in this subdivision and allocated to the record owner or owners of each lot. If the total sum due is not paid when due by a record owner or owners of a lot in this subdivision, then the Village of Arthur, Illinois, may exercise any remedy for the collection of said obligation available under the law of the State of Illinois. Further, the

10-16-1

10-16-1

record owner and owners of each lot hereby stipulate and agree that the Village of Arthur Sewer Department may add to the regular monthly sewer bill a sum, as determined by the Village Board, until such time as the unpaid obligation under this covenant has been fully paid, and hereby stipulates and agrees to an additional sum per month, as determined by the Village Board, as a finance charge for the privilege of not paying the obligation when due. The due date of the sum shall be determined by ordinance, but not earlier than thirty (30) days following substantial completion of the work.

CHAPTER 17
STREET SIGNS

SECTION:

10-17-1: Street Signs

10-17-1: STREET SIGNS: The developer shall provide and install street signs at each street intersection within the subdivision as well as intersections of the subdivision's streets with existing thoroughfares. Intersection numbers shall be posted and shall be in conformity to the Village's existing sign system.

CHAPTER 18

REQUIRED ENGINEERING PLANS AND CERTIFICATES

SECTION:

10-18-1: Required Engineering Plans and Certificates

10-18-1: REQUIRED ENGINEERING PLANS AND CERTIFICATES: In addition to the required engineering drawings, the developer shall submit to the reviewing authorities additional exhibits illustrating the type and location of additional improvements as required by these regulations.

The engineering drawings as required by these regulations shall be prepared by an Illinois Registered Professional Engineer, and bearing his name, address, telephone number, seal, registration number, and signature.

The developer shall obtain written approval of the engineering drawings from the reviewing authorities before required physical improvements are installed in the subdivision.

If the developer wishes to modify the size, type, quantity, quality, and/or location of any or all of the required physical improvements during construction of the subdivision, he shall first obtain approval of the modifications from the reviewing authorities before proceeding with the installation of the modified improvements. In those cases involving departure from engineering plans and specifications approved by the Village Board, the Village Board shall have sole power to allow for any engineering related changes, provided such changes conform to the intent and purpose of these regulations.

CHAPTER 19
RELEASE OF SURETY

SECTION:

10-19-1: Release of Surety

10-19-1: RELEASE OF SURETY: Upon completion of the bonded improvements, one (1) copy of the "as-built" plans, profiles, cross sections, and any special provisions shall be filed with the Village accompanied by an Illinois Registered Professional Engineer's certificate which states that the improvements have been constructed in accordance with the plans and specifications as set forth herein.

Any surety bond so given to guarantee the construction of all such improvements may be released by the Village Attorney only after receiving a written statement from the Village Board that all improvements have been constructed and that the certificates required in these regulations have been submitted. No portion of the surety bond may be released until after all work is so completed.

CHAPTER 20

INSPECTION OF IMPROVEMENTS

SECTION:

10-20-1: Inspection of Improvements

10-20-1: INSPECTION OF IMPROVEMENTS: Before beginning the construction of any improvements, the subdivider shall receive from a Consulting Engineer, as may be engaged by the Village Board on a case-by-case basis, a list of inspections required and shall comply with all rules, regulations, and instructions pertaining to such required inspections. The number and time of said inspections shall be determined by the Consulting Engineer after he has had an opportunity to study the size and complexity of the proposed subdivision, plat or map. Regardless of the contracts, agreements or inspections performed, responsibility for the supervision and inspection of the construction and installation of all improvements in accordance with these regulations shall rest with the developer.

When authorized road, street and drainage improvements have been constructed or installed and have passed the required inspections and the road authority having maintenance jurisdiction has previously indicated an intent to accept the same upon satisfactory completion, the streets, roads and drainage improvements so intended shall be tendered by the developer to the applicable road authority for acceptance. The power to include or not to include non-municipal roads for public dedication shall be that of the township road commissioner, as applicable under State Statutes. This power is not negated nor standards acceptable which are less restrictive than those herein contained, simply by Village Board action approving such a plat or subdivision. All responsibility for streets and roads not so accepted for public dedication by the proper authorities remain the responsibility of the developer and his successors.

The Village Board may establish fees for the providing of inspections by the Consulting Engineer.

CHAPTER 21**VIOLATIONS AND PENALTIES****SECTION:**

10-21-1: Violations and Penalties

10-21-1: VIOLATIONS AND PENALTIES: The following violations shall carry a penalty of one dollar (\$1.00) to five hundred dollars (\$500.00) per day per offense:

- (A) Recording of any plat or document portending subdivision, or a portion thereof not in conformity with these regulations;
- (B) The sale, offering for sale, or other transfer of ownership of any or all lots, without prior recording of any approved subdivision, as set forth in these regulations; and,
- (C) Construction in a recorded subdivision which is not in conformance with the recorded plat and approved engineering plans and specifications.

For purposes of this Section a similar violation occurring on more than one (1) lot or affecting more than one (1) lot shall be deemed to be a separate offense for each such violation on each such lot.

SOUTH CENTRAL ILLINOIS

Figure 4-103d

NOTATIONS REFERENCED FROM TABLE ONE

1. Pavement design shall conform to the design standards established by the Design Manual, as amended, of the Illinois Department of Transportation, Bureau of Design; except, that standards shown in Table 1 represent absolute minimums.
2. All definitions and descriptions of paving materials shall conform to Illinois Department of Transportation's specifications.
3. As measured along the road pavement.
4. The gradient within one hundred feet (100') of a street or road intersection shall not exceed two percent (2%).
5. The gradient within one hundred feet (100') of a street or road intersection shall not exceed three percent (3%).
6. As measured from the road rights-of-way to the building setback line.
7. For two (2) land undivided pavements, minimum pavement driving surfaces (pavement edge to pavement edge) shall be not less than twenty-six feet (26') in width, except that: when lot width averages as measured at the building setback line is less than one hundred feet (100') in width or the average lot area is ten thousand (10,000) square feet or less, the pavement shall not be less than thirty-six feet (36') in width (pavement edge to pavement edge). No parking will be permitted on streets with pavement less than thirty-six feet (36') in width.
8. Curbs and gutters shall be required as specified in Section 10-7-2 of these regulations

CHAPTER 23

REQUIRED CERTIFICATES

SECTION:

- 10-23-1: Required Certificates
- 10-23-2: Certificate for Final Plat
- 10-23-3: Deed of Dedication
- 10-23-4: Topographic and Drainage Certificate
- 10-23-5: Surveyor's Certificate
- 10-23-6: As-Built Engineer's Certificate
- 10-23-7: Surveyor's Monument and Pin Certificate
- 10-23-8: Acceptance of Streets and Roads

10-23-1: REQUIRED CERTIFICATES: The following certificates are to be used as a guide to indicate that the developer or his representative is in agreement with the intent of these regulations. Substitutions of alternative wording may be used where the intent is not changed.

10-23-2: CERTIFICATE FOR FINAL PLAT: This certificate shall be signed by the Village President, Village Clerk, Chairman of the Zoning Board and Secretary of the Zoning Board following an affirmative vote by the Village Board to accept the final plat of subdivision. This certificate shall be incorporated upon the face of the final plat as approved:

WE, _____, CHAIRMAN OF THE VILLAGE ZONING BOARD OF THE VILLAGE OF ARTHUR, MOULTRIE AND DOUGLAS COUNTIES, ILLINOIS, AND _____, SECRETARY OF THE AFORESAID VILLAGE ZONING BOARD, DO HEREBY CERTIFY THAT THE ATTACHED PLAT OF _____ WAS SUBMITTED TO THE VILLAGE ZONING BOARD AT A MEETING HELD _____, A.D. 20____ ATTENDED BY A QUORUM OF SAID VILLAGE ZONING BOARD AND THAT UNDER AUTHORITY PROVIDED BY ILLINOIS REVISED STATUTES AND ORDINANCES ADOPTED BY THE VILLAGE BOARD OF THE VILLAGE OF ARTHUR, THE SAID VILLAGE ZONING BOARD APPROVED SAID PLAT BY A VOTE OF A MAJORITY AND INSTRUCTED US TO EXECUTE THIS CERTIFICATE AS EVIDENCE OF SAID PROCEEDINGS.

GIVEN UNDER OUR HANDS THIS ____ DAY OF _____, A.D. 20____.

CHAIRMAN OF THE VILLAGE ZONING BOARD, VILLAGE OF ARTHUR, COUNTIES OF MOULTRIE AND DOUGLAS, STATE OF ILLINOIS.

ATTEST:

SECRETARY OF THE VILLAGE ZONING BOARD, VILLAGE OF ARTHUR, COUNTIES OF MOULTRIE AND DOUGLAS, STATE OF ILLINOIS

10-23-4

10-23-5

10-24-4: TOPOGRAPHIC AND DRAINAGE CERTIFICATE: An Illinois Registered Professional Engineer and the owner(s) of the subdivision shall submit this signed certificate to certify that the drainage of surface waters will not be changed, or if changed, will not harm adjacent properties. It shall be a part of the final plat and so recorded.

TOPOGRAPHIC AND DRAINAGE STATEMENT

We, the undersigned, respectively a registered professional engineer and the owner(s) of the land subdivided hereby, or the duly authorized attorney representing such owner, do hereby state that to the best of our knowledge and belief the drainage of surface waters will not be changed by the construction of such subdivision, or that if surface water drainage is changed, adequate provision has been made for the collection and diversion of surface waters into public areas or drains which the subdivider has the right to use, and such surface water practices will be planned for in accordance with generally accepted engineering practices so as to reduce the likelihood of damage to adjoining property because of the construction of the subdivision.

Engineer's Signature and Registration Number

Date

Owner's Signature and Address

Date

10-23-5: SURVEYOR'S CERTIFICATE: This certificate shall be signed by the surveyor and attached to the final plat to indicate the survey is correct and that the plat is or is not within five hundred feet (500') of and tributary draining six hundred forty (640) acres or more.

SURVEYOR'S CERTIFICATE

I, _____, hereby certify that I am a Registered Land Surveyor, licensed in compliance with the laws of the State of Illinois, that this plat correctly represents a survey completed by me on the ____ day of _____, A.D. 20____, that all monuments shown thereon actually exist, and that the location, size, type and material of said monuments are accurately shown. I further certify that no part of the property covered by this plat is located within a special Flood Hazard Area as identified by the Federal Emergency Management Agency.

Surveyor's Signature and Registration Number

10-23-6

10-23-7

10-23-6: AS-BUILT ENGINEER'S CERTIFICATE: This certificate shall be signed by the developer's engineer to certify that all improvements have been built in accordance with the final plat and approved engineering drawings and specifications.

AS-BUILT ENGINEER'S CERTIFICATE

I, _____, Registered Engineer in the State of Illinois, do hereby certify that I have made an inspection of the subdivision improvements construction in _____. I further certify that all improvements have been made in accordance with the approved plan and that said improvements are as shown on the attached "as-built" plan.

Dated this _____ day of _____, A.D. 20_____.

Surveyor's Signature and Registration Number

10-23-7: SURVEYOR'S MONUMENT AND PIN CERTIFICATE: This certificate shall certify that the permanent monuments and lot pins are in place before the streets and accepted. It shall be filed with the as-built plans.

SURVEYOR'S MONUMENT AND PIN CERTIFICATE

I, _____, of _____, Illinois, do hereby certify that I am a Land Surveyor duly licensed under the laws of the State of Illinois and that I have reset all permanent monuments destroyed in construction work and have set all pins at lot corners of (name of subdivision) and that said permanent monument and lot pins are in place as of this date.

Dated this _____ day of _____, A.D. 20_____.

Surveyor's Signature and Registration Number

10-23-8

10-23-8

10-23-8: ACCEPTANCE OF STREETS AND ROADS: This certificate shall be signed by the road authority who accepts the streets and roads, as applicable under Illinois State Statutes. It will be submitted after the final plat, "as-built" engineer's certificate accompanied by the "as-built" plans, and surveyor's monument and pin certificate have been received and upon completion, inspection and approval by said authorized jurisdiction.

ACCEPTANCE OF STREETS AND ROADS

The (Village of Arthur or Township Road Commissioner of Township) hereby agrees to accept the streets and roads in (name of subdivision) located in Section _____, Township _____ North, Range _____ (East of West) of the _____ Principal Meridian, said subdivision consisting of approximately _____ miles of streets and roads.

The (Village or Township, as applicable) will maintain the streets and roads, including snow removal from the traveled way, surface drainage of the streets and roads as it exists at the time of acceptance, existing culverts and surfacing of the streets and roads constructed according to approved plans and specifications.

Dated this _____ day of _____, A.D. 20_____.

Signature (of Township Road Commissioner, if applicable)

Dated this _____ day of _____, A.D. 20_____.
